Martin S. Gizzi, M.D., Ph.D.
New Jersey Neuroscience Institute
65 James Street
Edison, NJ 08820

Dear Mr. Martin Gizzi,

I would like to take the opportunity to express my deep gratitude to the New Jersey Neuroscience Institute at JFK Medical Center.

First, I want to personally thank Dr. Jawad Kirmani and his team for the wonderful treatment and dedicated care they showed when I was admitted to the hospital with a large brain aneurysm. Even though I was scared and I think still in a state of shock, they truly took the time to talk to me and explain the problem, and what was needed to be done to correct it.

It was then Ms. Ashley Wnek who stepped in and really assisted me in getting all of my paperwork completed and necessary appointments scheduled. Her kindness and professionalism helped me get through those nerve-wracking weeks prior to my procedure.

Dr. Kirmani and his surgical team's treatment of my brain aneurysm with the Pipeline Stent saved my life. I am truly grateful for their expertise, compassion, and thoroughness in answering any questions or concerns my family or I may have had. Without them all, I would not have been able to recovery as quickly and as well as I did.

Thank you once again for all of your care and support.

Best regards,

John M. Gulics
